The objective has been met, Yes, it provides a calendar with future national games and international games.

g) Does it provide location of Hasom?

The objective has been met

Yes, it provides an interactive map of where Hasom is located in.

Recommendations for future development

Hye Yeon believes that the website has one primary improvement, and it will be done in the future. The improvement involves setting up a way for updating the website regarding different future events that are upcoming. However, as my client does not know how to use HTML, I would have set up a way for my client to fill in a simple form, which will automatically update the website. This was something that I was considering prior to making the website, however I found it too challenging for my level of knowledge. I do recognise the fact that it is very important for businesses like childcare to have a way to contact parents regarding upcoming events. If parents didn't know what is going on in the childcare, parents would be worried. If this recommendation is implemented within the website, I think it would really great.
